

Taxapta™

AFFORDABLE TAX SOFTWARE FOR MICROSOFT AXAPTA™

Sales and Use Tax Returns

Preparing forms for tax remittance is no longer a manual, tedious and time-consuming process.

MBS Dev, Inc. has developed a system-level interface between Microsoft Axapta® and a proven sales/use tax solution provider, Independent Systems.

Cut the time required for sales tax remittance:
We solve your sales and use tax remittance problems with our sales and use tax forms solutions. Taxapta™ Returns maintains lines of communication with over 9,000 taxing authorities, covering over 45,000 cities across the country, keeping the tax form databases updated with the most recent state sales and use returns.

MBS Dev and Independent Systems Taxapta™ Returns provides the forms required for businesses that need a more efficient, fully automated means for populating tax forms with accumulated tax data.

Taxapta™

This Windows®-based program reads data from the Taxapta™ sales and use tax program (or your own system's fixed-length ASCII text batch transaction files), imports *all data* and then populates the correct boxes in each sales or use tax return. Sales tax returns may be printed from our catalogue of state-approved forms, or you may print directly to a form supplied by the state, county or city (where required). Taxapta™ Returns forms are created in Adobe Acrobat®, and generate publishing quality sales and use tax return forms.

For every state, county or city in the U.S or Canada that requires a sales or use tax return, you may import:

- ↑ Gross sales dollars
- ↑ Taxable sales or use tax dollars
- ↑ Non-taxable sales dollars
- ↑ Transit tax dollars
- ↑ School district dollars
- ↑ And much more!

Microsoft Certified Solution: Taxapta™ is a MS-Certified solution, delivered by a certified MS Axapta Partner, therefore you can count on comprehensive, fully coordinated support via MBS Dev's Customer Care Center.

Quarterly Forms Updates are sent prior to the beginning of each new calendar year quarter. Flexible electronic update options include website download, or email.

Semi-annual audits ensure maximized approval of Taxapta™ Returns forms throughout North America including the entire U.S. and Canada.

About MBS Dev

MBS Dev, Inc. is a certified VAR & ISV partner for the Microsoft Business Solution—Axapta. MBS Dev prides itself on it's World Class technical capabilities and solutions. Our goal, at MBS Dev, is not only to provide superior technical and development expertise but most importantly to be the Axapta development and service partner of choice providing our clients with full service, multi-discipline Axapta design and development service at a fraction of the cost of our competition.

About Independent Systems

Independent Systems has over 25 years of experience in Sales, Use and Payroll tax database management, calculations and forms. Independent Systems is a privately held software development company, incorporated in 1977 to market and support tax software for business. Independent Systems developed the expertise required to interact with state, county and city government agencies that levy and regulate sales & use tax on personal tangible property, a requirement of maintaining an accurate tax database.
